

SAGOLA

STABILITY AND SECURITY

PACK 6000 AIR HEATER

- > Stable painting process in areas with large temperature changes between day and night, winter and summer.
- > Constant working temperature.
- > Compact and robust.
- > Digital temperature display.
- > Cold touch, thermal insulation.

> It includes a Heated hose to get the maximum energy-performance:

- Constant temperature inside the hose, automatically controlled.
- It reduces the minimum working temperature.
- It makes the system independent to the room temperature.
- It reduces the wait time; the working temperature in the spray gun is faster achieved.
- All the advantages from the SAGOLA antistatic hose, now in a heated hose.

REDUCTION
of drying times

BETTER
stretching
of clearcoats

SAFE
and regular work
all the year around

Ref. 10 780 101

(hose included)

Easy to use; power button and temperature controller.

Out of the cabin installation.

Lightweight and small; easy to locate.

Right temperature in the spray gun almost immediately.

Low temperature, there is no need for gloves.

PACK 6000 AIR HEATER

- 1 Digital temperature display: working and real temperatures
- 2 Temperature controller
- 3 Power button
- 4 On/off indication light
- 5 Working temperature sensor
- 6 Internal heating part

- > P.I.D. digital temperature controller.
- > Thermocouple temperature sensor.
- > Self-learning function.
- > Overheating protection.
- > Automatic activation by flow switch.

TECHNICAL DETAILS

Dimensions: 455x92x255 mm.

Weight: 3,6 Kg.

Power: 240V 50/60Hz

Max. consumption: 800w

Max. working pressure: 7 bar

Max. flow at 7 bar: 750 L

Recommended temperatura chart:

- Clearcoats: 40-60°C
- Waterborne basecoats: 30-50°C
- Solvent based basecoats: 30-40°C
